SS Program Posttest4

1. Start Program

```
11 import java.util.ArrayList;
12 import java.util.Scanner;
13
14 public class Main {
15     public static void main(String[] args) {
16         ArrayList<WebtoonList> webtoonLists = new ArrayList<>();
17         Scanner scanner = new Scanner(System.in);
18
19         while (true) {
20             System.out.println(x: "==== List Komik ====");
21             System.out.println(x: "1. Tambah List Komik");
22             System.out.println(x: "2. Tampilkan List Komik");
23             System.out.println(x: "3. Ubah List Komik");
24             System.out.println(x: "4. Hapus List Komik");
25             System.out.println(x: "5. Exit");
26             System.out.print(s: "Masukkan pilihan: ");
27
28             int choice = scanner.nextInt();
29             scanner.nextLine();
30
31             if (choice == 1) {
32                 System.out.println(x: "Masukkan Judul Komik : ");
33                 String judul = scanner.nextLine();
34
35                 System.out.println(x: "Masukkan Genre Komik : ");
36                 String genre = scanner.nextLine();
37
38                 System.out.println(x: "Masukkan Status Komik : ");
39                 String status = scanner.nextLine();
40
41                 System.out.println(x: "Masukkan Episode Komik : ");
42                 int episodes = scanner.nextInt();
```

The screenshot shows an IDE with multiple tabs. The active tab is 'Main.java'. The code is a Java program for a comic list management system. It uses an ArrayList to store WebtoonList objects and a Scanner to read user input. The program has a main method with a while loop that displays a menu of options: 1. Tambah List Komik, 2. Tampilkan List Komik, 3. Ubah List Komik, 4. Hapus List Komik, and 5. Exit. The user is prompted to enter a choice. If the choice is 1, the program prompts for the comic's title, genre, status, and episode number. The code is partially visible, showing lines 11 through 42.
